MEMORANDUM FOR: [] NPIC

SUBJECT: Titling OXCART Material

In my discussions with [] on other subjects, I asked him for some education on titling of OXCART films and he provided me with the attached. In passing the letter, charts and samples on to you for retention or destruction, I am doing so with his knowledge. In addition to the attached, in recognizing there are some shortcomings to the cross frame titler, I would like to make mention that Eastman Kodak has the capability and money in the budget to convert the Delaware titler to permit it to include the same information as presently included on the film edge titling. It is evident that the present Delaware titler is cramped and limited in information. I am particularly referring to titling of the Type I camera. It is my personal opinion that since the money is available and the opportunity exists to start now to modify the titler or even rebuild it, I would recommend that we tell [] to go ahead with the new titler, maintaining the first two models in house and plan two more for [] for a total of four. I have to depend on you for advice on this matter since you are the ultimate consumer. Would appreciate your advice.
